SCC Graduate Enjoys Intrinsic Rewards of Teaching

Continuing Education Fall Schedule
A-Z Curriculum Programs

Cover Image: Sticy Saavedra is a 2014 graduate of Surry Community College who works for the Surry County Health and Nutrition Center full-time as a Spanish interpreter. Surry Community College offers a certificate in Community Spanish Interpreter. Top Inset: Young people who enter the electrical field will have a bright future due to a large demand for skilled workers. Surry offers a degree, diploma and certificate in Electrical Systems. Bottom Inset: Wilborn Rives is the lead instructor of Surry’s Paralegal program, an area of study that leads to jobs in many areas besides law – insurance, banking, government and real estate.
Sticy Saavedra moved to the United States from Guanajuato, Mexico, when she was only nine years old. In March of that year, she was enrolled in fourth grade at Franklin Elementary School in a totally English-speaking class. Initially, she only knew her colors and ABCs in English.

Saavedra remembers crying when she came home from frustrating days at school because she could not understand what her teacher or classmates were saying. She did not want to go back to school. Her mother told her to write down three or four words that she had learned each day and told her to be patient.

Being a quick learner, Saavedra was promoted to the fifth grade for the next year. She was in the school spelling bee in the sixth grade. Now that she is a Foreign Language Interpreter at the Surry County Health and Nutrition Center, Saavedra, 22, helps people every day who struggle with the same language barrier she faced as a child. She assists patients who are seeking dental, pediatric, primary care, family planning, and diabetes medical assistance with her interpreting skills.

“Interpreting is amazing,” Saavedra said. “I love being able to help people with the language barrier. There are a lot of Hispanics in the area, so there is a high need for interpreters. Most Hispanics know English, but they feel better with an interpreter. It’s wonderful to be able to help them. I am also helping the providers help the patients. As interpreters, we feel like the voice of the patient. The patients are very appreciative.”

Being bilingual and knowing how to interpret a language are distinctly different skills. A bilingual person speaks more than one language fluently, but an interpreter knows the art of translation, which is to be exact – stating only what is being said, nothing more or nothing less.

“As an interpreter, we also need to learn the backgrounds, cultures and the dialects people are using,” Saavedra said. “We must first know the person’s culture and background. Then, when we translate, we must be thorough and say exactly what the patient has said. We also advocate for the patient and make sure the doctor has all the information.”

Interpreters have to become familiar with the terminology of a particular workplace, and in her area, Saavedra has learned medical terminology. Her classes helped to prepare her, but she knew that when she got a job as an interpreter it was her responsibility to learn the vocabulary for the particular job setting.

“With interpreting, you never stop learning because you learn different things for each job,” she said. “It’s beautiful to know the language and at the same time learn new things about each specific job area. You need a love of learning to be successful in this field.”

Saavedra is a 2014 graduate of Surry Community College, having earned a degree in Community Spanish Interpreter. She started working for Surry County part-time in September 2014 and in March 2015 was hired full-time as an interpreter.

“I am very excited about my job. It’s never boring. There’s always something different with the subject matter and the different people,” she said. “I had been the interpreter for my family, and now I get to do it for other people. This job feels like a hobby to me. It’s never a struggle to come to work. I love my job, and I enjoy my co-workers.”

As a determined and focused student, Saavedra worked full-time at Chile Rojo in Mount Airy where she waitedressed while going to college after graduating from North Surry High School in 2011. She not only completed her goal of college studies, she excelled and was inducted into the National Honor Society of Leadership and Success with a 4.0 GPA.

In the mornings, Saavedra attended classes and then she worked second shift at the restaurant until 11 p.m. Then, there was homework to do before starting the next day. She also worked long hours on the weekends. While in school, she completed a work-based learning internship at WorkForce Carolina where she saw the strong need for Spanish interpreting as well.

“There’s a big need for interpreters especially in medical and business. It’s a great add-on certificate. Being bilingual is always a plus with employers.”

~ Sticy Saavedra

For more information on the Community Spanish Interpreter certificate, contact Chairperson Danajean Mabry at (336) 386-3284 or mabryd@surry.edu. You may also visit www.surry.edu.
Laura Hudson is pictured working with a group of children when she was in the Dominican Republic for a mission trip in 2010. She taught high school Spanish for about nine years and did interpreting in high school before coming to Surry Community College two years ago to be an instructor. She teaches Spanish along with courses in the Community Spanish Interpreter program. She has also taught English as a Second Language at Surry. Hudson received an undergraduate degree in Spanish Education and a graduate degree in Romance Languages - Spanish Teaching from Appalachian State University. She has studied abroad in Spain and has traveled to Mexico and the Dominican Republic.

With the increasing population of Hispanics/Latinos in the state and nearby localities, there is a growing need for bilingual speakers who are certified as Community Spanish Interpreters.

The Hispanic/Latino population in North Carolina is 8.9 percent, and locally, the Hispanic community is even larger – 10.5 percent in Yadkin County and 9.9 percent in Surry County, according to the 2013 US Census. In 2000, Hispanic/Latinos accounted for only 4.71 percent of North Carolina’s population.

Surry Community College instructors Jennifer Jimenez and Laura Hudson promote the Community Spanish Interpreter certificate as a way for students to make themselves more marketable in job searches.

“Adding the Community Spanish Interpreter certificate to your two-year degree is a good use of your time because employers want to see what’s different or better about you from all the other hundreds of applicants. Employers want to know what you have beyond the basics,” said Jimenez who was previously employed as a pharmacy technician where being bilingual gave her an advantage over other applicants.

“The certificate proves the student’s fluency and that they are skilled as an interpreter,” Hudson said. “A lot of businesses and organizations are looking for someone who is certified because employers are realizing that just because someone is bilingual doesn’t mean they can interpret.”

The Community Spanish Interpreter certificate complements many programs nicely in the medical field including Nurse Aide, Nursing, Medical Assisting and Medical Office Administration.

“Anyone going into the medical area could benefit from this certificate because that is where a large need is for interpreters, as well as in the legal arena. Also, insurance, accounting, business and social services are areas where there is a need. Viticulture students and construction students at Surry Community College take Spanish classes for the workplace that are catered to their particular areas. The need for Spanish speakers is everywhere.”

Other areas needing Spanish speakers include Cosmetology, Paralegal, Automotive, Accounting, Business Administration, Early Childhood, and Criminal Justice, which are all offered at Surry Community College.

“The need for Spanish Interpreters is high in many areas,” Jimenez said. “Many businesses are discovering that they can cater to the Hispanic population and gain more customers by having bilingual employees, especially in the service areas.”

In the medical field, interpreters need to be certified in order to follow HIPAA laws, so working interpreters are now coming back to school to become certified.

“We do a lot of role playing where someone is the patient, doctor and interpreter,” Hudson said. “We also look at the different Hispanic cultures and study how different Spanish-speaking countries use different words.”

Even native speakers learn how other Hispanic cultures say certain things, use different words for the same meaning and speak with different accents. It’s also important as an interpreter to be aware of these differences because you may be translating for Hispanic speakers from Mexico, Guatemala or El Salvador.

The Community Spanish Interpreter program requires a fluency test, the test, and instructors encourage students to not be afraid to take the test.

“We look at the overall performance and mastery of the grammar upon completion of the test. It’s not that tough if you have been taking Spanish and already have been around the language,” Jimenez said.

The certificate requires six classes – Culture & Civilization, Review of Grammar, Introduction to Translation, Introduction to Spanish Interpreter, Analytic Skills for Interpreting and Community Interpreting. Spanish 111 and Spanish 112 classes should be taken before the certificate for non-native speakers who can also succeed in the program.

For more information on the Community Spanish Interpreter certificate, contact Chairperson Danajean Mabry at (336) 386-3284 or mabryd@surry.edu. You may also visit www.surry.edu.
The Paralegal Technology program at Surry Community College can take people into a variety of career paths. Jonathan Semones of Mount Airy and Beverly Johnson of Dobson both graduated with degrees in Paralegal Technology from Surry Community College and now have successful careers outside of an attorney’s office.

Jonathan Semones is a mapper in the Tax Mapping Department in the Surry County Courthouse. He qualified for retraining through the Trade Act of 1974’s Trade Adjustment Program, which provides aid to workers who lose their jobs or whose hours of work and wages are reduced as a result of increased imports. The program paid for tuition, books, supplies and mileage while students also received unemployment checks. Semones decided to go back to school and take advantage of this great opportunity.

“I had been a machine mechanic for 27 years. I wanted to do something totally different. I was really burned out,” he said.

Going back to school at 48 years old was not originally in Semones’ life plans. He graduated from Mount Airy High School in 1979.

“I resented the idea of going back to school, but I knew I had to go and excel if I wanted to retrain to go into a different career,” he said.

After making high scores on the placement test, Semones found out that he would not have to take any remedial courses, which gave him self-confidence.

“That was a boost. I had been dreading it so much, and then I did well on the placement test. I thought maybe I can do it,” he said. “I had been out of high school for 30 years. I did feel uncomfortable at first being with students who were fresh out of high school. I knew I couldn’t go home to mama if I didn’t make it. What surprised me was that my life experience and work experience had prepared me for college. I was more responsible, and I had definite goals. I was focused.”

The term real property in the Paralegal Technology curriculum piqued his interest.

“I looked at Paralegal Technology and saw real property was included in the course lineup. That was the terminology that made me look twice,” he said. “I had always found property interesting – the buying and selling of property and dealing with deed research and boundary issues. My wife had inherited a piece of property, and I did a lot of research at the register of deeds office trying to find answers about the boundaries. I had to trace information back to 1813. It was almost like an obsession for me to find the answers.”

Semons was able to maintain a 3.8 GPA while in the program and only stumbled a little bit with keyboarding and text entry.

“I forced myself to learn the keyboard without looking,” he said. “It was hard. The teacher covered the letters on the keys. There was much wailing and gnashing of teeth. I really struggled, but I passed with a C.”

Now, Semones is happily working as a mapper in the Mapping Department at the courthouse, which is also where he did a work-based learning internship as a student when he did research on properties with clouded ownerships.

“I had a great experience at Surry Community College. It was convenient, and the instructors were great. The library had good resources for papers and databases online. I ended up liking the challenge of college even though I didn’t necessarily invite the challenge into my life. Once I got into it, I enjoyed it.”

Semons graduated from Surry in December 2009 and was hired at his current position in May 2011. Semones spends his days examining deeds and making sure they are recorded properly. He also answers questions from citizens and assists appraisers and attorneys with information.

“I have landed right where I should have. I love it. I am very satisfied. It’s a love affair – this job was made for me, and I was made for it,” he said. “It’s challenging, and I am providing a service for something that is needed. I make crucial decisions that pertain to how property in Surry County is mapped. Ensuring that the property is recorded correctly prevents a lot of problems for landowners down the road.”

Beverly Johnson started taking classes in Nursing at Surry Community College and then decided it wasn’t the correct career path for her. She wanted to be an attorney, so she took classes in Criminal Justice. She met her husband and decided to get married, so her plans for law school changed.

Johnson always liked the legal field, so she started taking Paralegal Technology classes at Surry and earned a two-year degree in the discipline and graduated from college in 1992. While she was in college, she did a work-based learning internship at the local probation office, which was an eye-opening experience for her.

After graduation, she worked as a paralegal doing lots of title searches, wills and administrative work. She wanted to do more specialized paralegal work, but did not want to commute to Winston-Salem. She started selling insurance for Farm Bureau where she worked for 10 years as a licensed agent.

“The Paralegal Technology degree got me in the door at Farm Bureau,” Johnson said. “I used the experience from my classes to read and interpret insurance policies, which are written by lawyers.
In The Spotlight

Paralegal Degree Leads to Job With Two Years of Study

Wilborn Rives is the lead instructor for the Paralegal Technology program at Surry Community College. He is a Mount Airy native who graduated from N.C. State University in 1972 with a bachelor's degree in Politics. He worked in the private industry for 10 years before going to law school. He graduated from Wake Forest Law School in 1985 and practiced law in Surry County for 12 years. Rives has been teaching full-time at SCC since the paralegal program’s inception in 1992.

The Paralegal Technology program offers Surry Community College students a way to get an associate’s degree that will lead to a job in many different areas including law, insurance, banking, local government and real estate.

After obtaining a two-year degree in Paralegal Technology, students can sit for the North Carolina Paralegal Exam and become credentialed for the rest of their life if they maintain the continuing education requirements.

Former attorney Wilborn Rives is the lead instructor for the Paralegal program.

“Surry Community College has the unique benefit of being in the county seat and having the courthouse accessible to our students. We really use the courthouse as a lab,” Rives said. “We have always had great support from our local judges, attorneys, clerk of court, register of deeds and tax office when we visit the courthouse. These people not only take time out to help our students when we visit during class, but also provide many of our work-based learning opportunities.”

Many students ask Rives if they can get a job by majoring in Paralegal Technology.

“This curriculum certainly prepares students for jobs that can lead to really good career paths. It doesn’t have to be in the law field. There are many opportunities for people with paralegal skills,” he said. “I think some high school students overlook the advantage of a two-year degree. It’s a huge financial benefit to be able to go to a community college for two years, earn a degree and get a job and be practically student-loan free when you are 20 years old.”

The degree complements Business Administration and Criminal Justice if students want to complete two associate degrees while at Surry. Paralegal graduates have also completed four-year degrees in Criminal Justice and Human Services.

Students excel in this field if they are detail-oriented and enjoy communicating with people and like to be problem solvers. The program requires good reading and writing skills.

The curriculum covers legal research and writing, civil litigation, real property law, criminal law and procedure, commercial law, family law and bankruptcy collections.

“This is not mundane, routine material. It is interesting,” he said.

While at Surry, students can join the Paralegal Club that participates in Student Government Activities on campus along with taking an annual field trip that is funded by club-sponsored fundraisers.

Rives recommends high school students who are interested in the Paralegal degree to take math, English, social sciences, and fine art requirements through the tuition-free Career and College Promise dual-enrollment program as a way to fast-track into the Paralegal program once they graduate from high school.

For more information about the Paralegal Technology program, contact Wilborn Rives at (336) 386-3257 or rivesg@surry.edu.

Continued from page 4

So I was used to the language and style of legal writing. Insurance and law go hand-in-hand.”

In 2003, she had the opportunity to buy in at Chappell Insurance as a partner, and she seized the opportunity. Then in 2006, she and another partner Keith Wilmoth bought the other partners out.

“People do not realize the areas that Paralegal can lead into besides working for an attorney, such as dealing with legal documents in the county offices or working in insurance and in business,” she said.

“There are so many different things you can go into.”

Tort law improved her knowledge of insurance contracts and claims, whereas her paralegal studies helped with life insurance, wills, trusts and estate documents.

“My classes have helped me in the business world. My education at Surry Community College helped me get to where I am today, and not getting a four-year degree has not hurt me,” she said. “My education has prepared me to be a business owner in dealing with human resources responsibilities as well.”

“I loved all my classes at Surry Community College. I liked going to school and taking classes that I enjoyed. It was never boring. All the instructors were attorneys, and they were very knowledgeable and able to share real-life experiences in the classroom. I was very interested because each class dealt with real life issues. I recommend Surry Community College. It’s local and personal and not too big,” she said.

Chappell Insurance sells policies for 15 different companies. The staff matches the best policy with the client’s needs.

“I like doing different things every day. It’s not cookie cutter. It’s interesting and challenging. The favorite part of my job is working with the people and the public. I like assisting people with questions and solving their problems.”

For more information about the Paralegal Technology program, contact Wilborn Rives at (336) 386-3257 or rivesg@surry.edu.
The need for electricians is expected to grow by 20 percent between 2012 and 2022, according to estimates by the United States Department of Labor, yet the number of young people obtaining electrical licenses is in drastic decline.

“This is a situation where our country is really going to be in an electrician crisis since the need for skilled and licensed electricians is there, but the number of people coming into the field is less,” said Tim Norman, who is the Director of the NC State Board of Examiners of Electrical Contractors.

Norman, who is a graduate of Surry Community College and a Surry County native, thinks the previous slow growth in the construction industry caused the decline, but now the economy is improving.

In 2003, 16,357 electricians were licensed in North Carolina whereas in 2014, only 13,211 people earned licensure, which is a 19 percent decrease, according to research provided by Norman. Another notable figure shows that the average age of the licensee is 53.5 years in 2014, whereas in 2003 the average age was 47.

“The most staggering fact is that less of the younger folks are coming into the trade. Of the licensed electricians in the state, only 130 are between the ages of 18 to 30 as of 2014 research,” said Tim Norman, who is the Director of the NC State Board of Examiners of Electrical Contractors.

Norman received a degree from Surry Community College in Electrical Maintenance in 2000. He has an extensive background in the electrical industry having served as a state electrical inspector and a construction engineer/project monitor when he worked for the State Fire Marshals Office and then the Department of Administration and State Construction office. He began working in his current position in April of 2014.

His agency licenses electrical contractors in the state and keeps up with the continuing education hours required to maintain electrical licenses. Norman hopes that by reaching out to community colleges and high schools, he can get the word out about the demand for electricians.

Surry Community College has an Electrical Systems program that offers an electrical track and a photovoltaic (PV or solar) track. Students receive apprenticeship hours by taking classes at Surry Community College. A degree, diploma and certificate are offered in each area. The certificates are available for high school students through Career and College Promise, which is a dual enrollment program where students can earn high school and college credits tuition-free.

“Students can obtain 50 percent of their apprenticeship hours while at college earning a degree,” said Joey Boles, who is the Lead Instructor of Electrical Systems Technology. “Students also have the option to get a dual degree in electrical and photovoltaic, which makes them more marketable.”

North Carolina offers 10 different classifications of electrical contracting licenses.

“I would recommend going for the unlimited license classification. Then, you can do any electrical job you want, regardless of the contract price,” Boles said.

For more information about the North Carolina State Board of Examiners of Electrical Contractors, go to at www.ncbeec.org. To learn more about the Electrical Systems Technology program, contact Joey Boles at (336) 386-3267 or bolesjc@surry.edu or Chairperson Jason Randall at (336) 386-3435 or randalllj@surry.edu. You can also visit www.surry.edu to learn more.

Surry Community College student Soloman Allen is wiring an electrical circuit into the main panel. Surry offers a degree, diploma and certificate in Electrical Systems with an electrical track and photovoltaic (PV or solar) track.

Electricians also make a good living with the 2012 median pay reported at $49,840 per year or $23.96 per hour, according to the U.S. Department of Labor Bureau of Labor Statistics.

“There’s money to be made in this industry. It’s been very good to me. It’s my age group’s responsibility to pass the skills down to the younger generation. This is a great opportunity for young people especially when the economy comes back. They need to step in and fill some big shoes then have successful and rewarding careers in the electrical field.”

Student Clay Morris is working on grounding for circuits. Electricians are in high demand and make an average of $49,840 per year.
Making a difference in the lives of children is why Anna Jessup wanted to become a teacher. “Teaching is the profession that creates all others. I know that I make a difference in these kids’ lives each and every day whether I give them hugs that they don’t get at home, or I inspire them to become future scientists, teachers, or even astronauts. This is such a rewarding profession.”

Jessup earned a degree from Surry Community College’s Early Childhood Education program and then transferred to the University of North Carolina at Wilmington to get a bachelor’s degree. She now teaches pre-kindergarten at Pine Hall Elementary School in Stokes County. As a teenager, she was inspired to go into teaching when taking Early Childhood classes at West Stokes High School.

“I knew right then that that’s what I wanted to do. I had always loved children. I took parenting and child development. I liked the classes and learning about kids. Then I took Early Childhood I and II. We went to King Elementary to a pre-K class. My heart just knew that this is where I was supposed to be. It didn’t feel like a job.”

Jessup started attending Surry Community College during the fall of 2010, and she graduated in May of 2012. “Thanks to the articulation agreement between Surry and UNCW, I was able to finish in four years. The transfer process was very easy,” she said.

Jessup received a bachelor’s of arts in the Education of Young Children from UNCW in May 2014. She is licensed to teach birth through sixth grade.

As a pre-K teacher at Pine Hall Elementary, Jessup is enjoying her daily journey. “The children are all so sweet. Every day is an adventure. That’s what I love the most about it. I don’t know what is going to happen or what the kids are going to say,” she said. “I have a lesson plan, but I veer off of it depending on their interests. If they get fascinated about a bug on playground, I’ll change the lesson plan to include insects.”

Her recent class had nine children, and she explained that children like to learn in different ways. “The biggest challenge is to make sure the instruction is differentiated for children who are at different levels,” she said. “We also learn manners and good behavior and doing things because it’s the right thing to do.”

Jessup is proud of her students who have all made great progress this year. She noted one student who had cried a lot at the beginning of the school year and is now happy. “It’s just amazing to watch them grow and mature and watch them learn new things every single day,” Jessup said. “Those are the rewards of the job – it’s not just a paycheck. My job is very rewarding. I just love what I do so much.”

She recommends Surry Community College’s Early Childhood program. “I love Surry Community College. I was scared to death first starting out. Then, I just felt at home there. The faculty was always friendly and willing to help. They even helped me with my transition to UNCW. I liked the small campus at Surry. SCC has a special place in my heart.”

Also, going to Surry Community College before UNCW was a good plan for Jessup as it is for other students. “Surry helped prepared me for UNCW. I knew I needed to work hard if I wanted to go to a good university,” she said. “I felt very prepared and confident when leaving Surry to attend UNCW. I knew that I would be successful because I was prepared academically for the workload.”

The Early Childhood program at Surry Community College is accredited by the National Association for the Education of Young Children. The program is offered online or seated. A two-year degree is available along with a certificate in Infant and Toddler Care. Students can complete credentials in NC Early Childhood and NC Early Childhood Administration while at Surry.

The Early Childhood Degree program prepares students for careers in childcare centers, developmental day programs and public schools. Coursework includes child development; the physical and nutritional needs of children; care and guidance of children; and communication skills.

For more information about the Early Childhood program, contact Chairperson Danajean Mabry at (336) 386-3284 or go to www.surry.edu.

ANIMAL & PET CARE

Note: Pre-registration and pre-payment required. You may register online or use the form in this brochure to mail, walk-in, or fax your registration and payment. Call (336) 386-3398 for more information.

Vet Assisting I
If you would like to learn to care for your pets or if you are interested in working as an assistant in a veterinarian’s office, our animal care classes will prepare you. In Vet Assisting I, you will have hands-on experience in the skills needed to assist with an animal’s physical examination. You will also learn about animal anatomy and physiology, animal diseases, recordkeeping, the law, and other topics.

Cost: $127
August 24 – December 7
M, 6pm-9pm
Location: SCC, K117

Pet Grooming
This 24-hour course allows students to learn proper techniques for pet grooming. By bringing his/her own pet, each student receives instruction in a hands-on environment. Topics for the class include small animal grooming techniques, use and care of animal grooming tools, small animal handling methods, and the basic anatomy of small animals.

Pre-registration and pre-payment required. Please call 336-386-3580. No certificate, diploma, or degree is issued upon completion.

Cost: $71
September 10 – October 29
Th, 6pm-9pm
Location: Yadkin Center, 126

ARTS & CRAFTS

Note: Pre-registration and pre-payment required. You may register online or use the form in this brochure to mail, walk-in, or fax your registration and payment. Call (336) 386-3229 for more information.

Barn Quilts
Quilts, always a beloved symbol of comfort, family, heritage and community, have taken a new twist. A barn quilt will provide wonderful visual art for your barn or building. Traditional quilt patterns will be painted on primed sign boards. All materials will be supplied for this class. Class size limited to six students.

Cost: 2x2 - $125, 3x3 - $200, 4x4 - $225
September 19 Register by Sept 4
Sat, 9am-4pm
Location: SCC Dobson, J Bldg

Sat, 9am-4pm
Location: Pilot Center

Applique Workshop
Applique is one of the oldest forms of decorative quilting. You learn the various techniques of applique. Needle turn, hand applique, raw edge applique, and fusible applique. It is truly an art. Some supplies will be provided, however, students will provide additional supplies. Please ask for a supply list.

Cost: TBD
October 3, Saturday, 9am-4pm
Elkin Center, 105

Hand Quilting Workshop
Quilting has been done for many years and is well known all over the world. It has changed over time, as it began to fill a basic need for warmth, but is now an art form. Today, the art of quilting has become quite popular as there are many more women and men who take up quilting and enjoy the craft. Quilting is a hobby that allows you to add a personal touch in making your next quilt your unique creation. In this class you will learn to layer your fabrics, properly hoop your piece, how to use stencils and make small even stitches in a variety of patterns and designs. Supplies are an additional cost to the student. Please ask for a supply list.

Cost: $40
August 8
Sat, 9am-4pm
Location: Elkin Center, 105

Jelly Roll Race / Lap Quilt
This quilt is so fun to make! You begin making this quilt by buying a jellyroll. This is 40 or 42 strips of fabric that are 2.5 inches wide and about 44 inches long. The fabric in each jellyroll typically comes from one line of fabric. This is a huge plus because it means that all the colors in the quilt will coordinate. You will complete your quilt top in class. You will learn how to layer your top, batting, and backing and machine quilt. Quilt size will be approximately 65” x 70”. Supplies are an additional cost to the student. Please ask for a supply list.

Cost: $40
August 15
Sat, 9am-4pm
Location: Elkin Center, 105

Beginner Sewing at the Pilot Center
Have you ever wanted to learn to sew but thought it was too daunting of a task to take on? Are you looking for a class that will teach you the basics of sewing in a relaxing and stress-free environment? For a beginner, nothing is better than to start with an experienced instructor and other novice students. Whether you are a newbie just learning how to sew or a beginner looking to sharpen your sewing skills, you will develop a skill that will stay with you for the rest of your life and can become a gratifying hobby. Students will work on a simple project of their choice.

The first class will be primarily instruction of basics, as well as a discussion of the students’ preferred projects with suggestions and guidance from the instructor. This class will guide you through the process of how to: use a sewing machine; read and use a pattern; recognize straight and cross grains

in fabric; properly cut and mark fabric; use various helpful sewing tools; identify and use interfacing; and properly press as you sew.

Cost: $79
September 1 – September 22
T, 6pm-9pm
Location: Pilot Center, 134

Quilting at the Elkin Center
Beginning quilters and experienced quilters may choose any quilt pattern to complete. One-on-one instruction is given as needed.

Cost: TBD
September 14 – November 2
M, 2pm-5pm
Location: Elkin Center, 105

T-Shirt Quilt
Create a memory quilt with your favorite T-shirts. You will complete four shirts in class, but you can add more T-shirts after class to make your quilt larger. You will learn to stabilize the T-shirt material, add sashing, and add batting and backing. You will also learn how to bind to finish the edges of your quilt.

Cost: $45 / Price includes stabilizer material for four shirts. Other supplies are an additional cost to the student. Please ask for a supply list.

September 26, Saturday, 9am-4pm
Location: Elkin Center, 105

College & Career Readiness

For more information, contact Jennifer Pardue at (336) 386-3674. facebook.com/surrycollegeandcareerreadiness

Students must be at least 16 years old to enroll in our College and Career Readiness programs. If a student is under 18 years old, they must complete a Surry Community College student release form which is available online at www.surry.edu, from the Corporate and Continuing Education office in Dobson or the following learning centers:

- Main Campus in Dobson (336) 386-3674
- Elkin Center in Elkin (336) 386-3604
- Jones Family Resource Center in Mount Airy (336) 386-3688
- Pilot Center in Pilot Mountain (336) 386-3618
- Yadkin Center in Yadkinville (336) 679-4600 ext. 3594

Adult Basic Education (ABE)

Adult Basic Education is a program of instruction designed for adults who need to improve their reading, writing, speaking, problem-solving, or computation skills to function more effectively in society, on the job or in the family.

Classes are offered at our learning centers in Dobson, Elkin, Mount Airy, Pilot Mountain and Yadkinville.

Surry Community College also offers ABE classes designed specifically for adults with developmental disabilities and traumatic brain injury. The focus of these classes is to improve the individual’s independence by acquiring necessary basic life skills from math and reading skills to job development. Students also gain appropriate communication, socialization and computer skills in these classes.
Classes are offered at LIFESSPAN in Dobson and New Horizons Adult Day Services in Yadkinville. Books, materials and instruction are provided free of charge.

For more information, contact Jennifer Pardue at (336) 386-3674.

High School Equivalency (HSE)
The HSE test is computer based, but paper testing is available as an accommodation. The test has four content areas:

1. Reasoning through Language Arts (150 minutes)
2. Mathematical Reasoning (115 minutes)
3. Science (90 minutes)
4. Social Studies (90 minutes)

The test is offered in English and Spanish on the Main Campus in Dobson in the Surry Community College Testing Center located in the Reeves Building (A-Building). Students must apply and pay for testing through www.GED.com. The test requires students knowledge of basic computer skills, which is part of Surry’s HSE curriculum. The cost to students is $20 per test for a total of $80 for the entire series. When students pay for one test, they get two retakes at no charge. After the third attempt to pass a test, students must wait 60 days before they can take the test again. Upon attaining minimum standard scores of 150 on each of the four tests and a total of 600, a High School Equivalency diploma is awarded to the student by the State Board of the Community College System.

ABE/HSE Orientation*New Location
There is a mandatory one-day, four-hour orientation required for new ABE/HSE students and students returning after six months. The orientation will be held on the Main Campus in Dobson in the Shelton-Badding Viticulture and Enology Building (SBVE). Students must bring picture identification such as a driver’s license/permit or government issued photo and a social security card to orientation. Any student age 16 or 17 must present a completed student release form. Contact one of the staff members listed below to register for orientation:

- Jennifer Pardue, Chief HSE Examiner/Assessment Specialist, (336) 386-3674
- Nichole Shores, Transitions Coach (336) 386-3441
- Mary W. White, Program Coordinator (336) 386-3244

HSE Online
For more information, contact Jennifer Pardue at (336) 386-3674.

This course will help students prepare for the high school equivalency test in the comfort of their own home or anywhere they have Internet access. Complete HSE orientation with at least a fifth grade level in Reading (determined by your TABE reading score), and students will be considered a candidate for the HSE Online class.

For more information in regard to any of these College and Career Readiness Programs, feel free to contact the following staff members:

- Terri D. Cockerham, Director (336) 386-3244
- Mary W. White, Program Coordinator (336) 386-3261
- Nichole Shores, Transitions Coach (336) 386-3441

Corporate and Continuing Education offers computer classes appropriate for the beginning student with minimal skills or students who wish to expand their knowledge. Classes are available for those seeking workplace related skills, including Microsoft Office programs. Classes suitable for Microsoft Certification are also available. Classes for seniors and beginning level students desiring basic computer and Internet skills are also being offered. Some classes are available at no cost. The following is a sampling of classes offered.

How to use a Computer for Seniors
This class is designed to be hands-on and user friendly for senior citizens. Topics taught in this class vary, and each session will include topics like: computer basics, how to copy and paste, using spreadsheets, and Internet skills. Students will be shown how to use the computer for things like their daily planner, address book, calendar, notepad, files, folders, papers and more. You will be shown how to use your computer to watch videos, listen to music, organize your photographs, send mail, etc. The goal of this Computer Skills for Seniors course is to show you how to do all of this with the least amount of strain and frustration. This course will start with basic computer exercises that allow you to practice what you’ve learned. Handouts will be provided to each student.

Microsoft Windows, MS-Word & MS-Excel

This seven-week course will show the student how to use: MS-Windows, MS-Word, and MS-Excel programs. Students will be introduced to basic computer terms, how to use the Windows controls, file management, word processing and spreadsheets while developing a moderate comfort level of basic computer skills. Students will be shown how to work with files, create new documents, how to save and rename documents, how to work with text to include editing, typing, inserting, highlighting, and deleting text. Students will learn how to write formulas and use built-in functions to have Excel automatically calculate totals, averages, monthly loan payments, and other common business calculations.

Cost: $127
Offered on demand.

Technology Awareness

This course provides employability skills training for unemployed and underemployed adults. The curriculum framework and the content of the instructional materials should focus on the following topics: developing a moderate comfort level of basic computer-use skills, using technology in developing and implementing job search strategies, researching career and occupational information, compiling and developing employment related documents (resume, cover letters, applications and electronic employment portfolios), accessing governmental and educational resources, assessing technology literacy, understanding the impact of social networking on employment, and emphasizing the role of technology in the workplace. This course will also include an introduction to additional forms of technology including the use of tablets and smartphones for the workplace.

Cost: $127
(Tuition may be waived for the unemployed and under-employed.)

Defensive Driving Course (DDC)- Attitudinal Dynamics of Driving (ADD) 8 hour
DDC – ADD is used extensively for court referrals as a diversion program for drivers with excessive violations and to retrain drivers with poor driving records. This class is a highly participatory class that assesses the individual’s behavior and then involves the students in developing a plan to improve their driving behavior. This class helps the individuals to understand their driving choices and how to improve them. The program helps create a new mind set while improving a person’s attitude so that his or her driving behavior can change. This class is a one-day, eight-hour class. You will need to bring a copy of your traffic citation when you pre-register. The DDC-ADD Course is a program of the National Safety Council and administered by the Safety and Health Council of North Carolina in cooperation with Surry Community College. A certified DDC-ADD instructor will conduct the program.

Note: Pre-registration and pre-payment are required at least 48 hours before the class date. Please call (336) 386-3473 for more information.

Emergency Medical Technician - Basic (EMT-B)
The Emergency Medical Technician-Basic course establishes the basic knowledge needed to provide, under medical authority, pre-hospital emergency care and to pass the NC State and/or National Registry certification exam. Students will acquire basic life support knowledge through a combination of classroom instruction, practical laboratory exercises and clinical experience in hospitals. Students will acquire a thorough understanding of criminal, civil and vehicle laws pertaining to the EMT’s services; develop understanding and knowledge of human anatomy and physiology; deal calmly and efficiently with childbirth, injuries, poisonings and other medical emergencies such as heart disorders, strokes and diabetes; and in general be able to provide basic life support for seriously/critically ill patients.

This course follows the guidelines established by the NC Office of EMS. The curriculum for the EMT-B educational program shall be the National EMS Education Standards including the 1994 United States Department of Transportation (US DOT) National Highway Traffic Safety Administration (NHTSA) EMT-Basic Course: National Standard Curriculum along with the Supplemental Airway Modules for EMT-Basic: NCF.

Student prerequisites:
• High school diploma or High School Equivalency diploma
• Successful completion of the TABE assessment exam for basic reading comprehension skills. This testing will be assessed during the orientation period of the first class meeting.

Total hours: 190 - 208

Cost: $180
(Tuition waived for members of approved NC Lifesaving Organizations.)

LAW ENFORCEMENT

Basic Law Enforcement Training (BLET)
This course is accredited by the NC Criminal Justice Training and Standards Commission. Persons desiring to become a sworn law enforcement officer in North Carolina must successfully complete this course in its entirety and pass a state exam. This course consists of 678 hours of training including classroom and practical skills. To qualify for admission, an individual must meet the same requirements as those mandated by the NC Criminal Justice Standards/NC Sheriffs’ Standards Commission for a sworn law enforcement officer.
Requirements: Prospective students must contact Ron Hill at (336) 386-3292 or Sandy Wall at (336) 386-3202 for an interview appointment and to receive the application packet. Course tuition will be waived through a law enforcement agency sponsorship. Students may also attend by paying the tuition personally.

Tuition: $180 (waived if student is sponsored by a department)
Books $630
Materials Fee $125
Uniforms $125

Day Course II
July 13 – December 3, 2015
Monday-Friday, 8am-5pm
(plus 12 nights, 1pm-10pm)
Location: CPS Mount Airy, 113

Radar Initial Certification
This course is a commission-mandated course accredited by the NC Criminal Justice Standards Commission. This course is designed to provide the student with the skills to proficiently perform essential functions as a radar operator. Only sworn certified law enforcement officers may enroll in this 40-hour course.

Radar, Time Distance, Lidar Recertification
These courses are required for recertification in speed measurement courses by the NC Criminal Justice Standards Division. Courses consist of 16 hours of training and are scheduled throughout the year.
Certified Nursing Assistant (CNA): Nurse Aide Level I
CNA I prepares the student to provide personal care and perform basic nursing skills for the elderly and other adults. Students may seek employment in a variety of healthcare settings. Upon successful completion of the CNA I course and the certification exam, the student will be listed on the North Carolina Division of Health Service Regulation Nurse Aide I Registry. Current cost for the certification exam is $101. This is a 188-hour course.

Note: Registration is currently open for all students. New students must register in person by coming to J-120 (Corporate and Continuing Education Office on SCC Dobson campus). Current or returning students may register online by going to www.surry.edu. Call (336) 386-3423 for more information.

Cost: $183 plus $53* for urine drug screening and criminal background check and $16* for malpractice insurance. Virginia students will have an additional $10 fee for this service. Total $252.*

*Fees are subject to change.

Phlebotomy I (Hybrid)
This course prepares the student to work in hospitals, physician offices, as well as privately-owned laboratories. The course is in two parts. The first part is 96 hours of didactic and lab. The second part (Phlebotomy II) is 100 hours of clinical. The student will be given a designated clinical site and will perform learned skills while under the supervision of a preceptor. Pre-requisites: High school diploma or High School Equivalency diploma required for the national certification exam.

Cost: $183
July 13 – December 7
TTh, 5:30pm-9:45pm
Location: SCC, J205

Pharmacy Technician
This course prepares students to work under the supervision of a pharmacist in a hospital or retail pharmacy. Topics covered include drug classification, drug distribution, anatomy and physiology in relationship to disease with an emphasis on drug therapy, and laws and regulations basic to pharmacy practice.

Note: Students who complete this course successfully may sit for a national certification exam through Pharmacy Technician Certification Board (PTCB). This is a 96-hour course. Pre-registration and pre-payment required.

Cost: $183
August 17 – November 9
MW, 5:30pm-9:30pm
Location: SCC, J201

Medical Coding and Billing (Hybrid)
This course prepares an individual for entry-level healthcare billing and coding positions. Course topics can include but are not limited to the roles and responsibilities of this position, managed health care, life cycle of an insurance claim, legal and regulatory considerations, coding regulations, reimbursement issues, claims instructions, medical terminology, billing commercial claims, insurance plans, Medicare, Medicaid, Tricare, and Workers’ Compensation. New ICD 10 coding will be included in this course. Upon completion, students should also be able to utilize MS Windows and the Internet to effectively retrieve billing-related information and updates. This is a 156-hour course. Students may seek certification in coding after taking this course.

Note: Medical Terminology is strongly recommended for this course. Good computer skills are a MUST. A limited number of seats are available for this class.

Cost: $183
July 20 – December 9
MW, 6pm-10pm
Location: SCC, J107
Sports Medicine Technology I

This course is designed for students who are looking to work in the field of Sports Medicine such as athletic training, personal training, physical therapy, performance enhancement, occupational therapy, and orthopedics just to name a few. Students will gain necessary skills and knowledge in the basic fundamentals and concepts in health science, medical terminology, emergency preparedness, anatomy and biomechanics, kinesiology and injury, therapeutic modalities and rehabilitation, and fitness programming and design. This program places an emphasis on the learning objectives of the National Academy of Sports Medicine, the American Council on Exercise, and the professional domains of competency set by the board of certification for the athletic trainer. Upon completion of this course, the student will be eligible to sit for a national certification with a number of different nationally accredited organizations such as the NASM, ACE, ACSM, and NETA. In addition to acquiring the skills needed to obtain a national certification, the student will also be positioned to transition into other advanced level programs and degrees in the sports medicine field.

The course is divided into two parts Sports Medicine Technology I and II. Students will be eligible to sit for certification(s) at the end of each part. There are a limited number of seats available, so please register soon.

Cost: $183
August 11 – December 8
TTh, 9am-3pm
Location: SCC, J 201

NC Motorcycle Safety Program’s Basic Rider Course

The basic course teaches the skills necessary to operate a motorcycle in traffic. This course consists of both classroom and driving range activities. Motorcycles are provided for the BRC course. Each site has a limited supply of helmets in various sizes. If possible, bring your own helmet to the riding portion of the course. The course consists of 22 hours of training.

NOTE: The Friday evening classroom session is conducted in J-107. The remainder of the course is conducted at the Emergency Services Training Center behind the baseball field off Comer Blvd. in Dobson, NC.

MUSIC

Note: Pre-registration and pre-payment required. You may register online or use the form in this brochure to mail, walk-in, or fax your registration and payment. Call (336) 386-3229 for more information.

Beginner Mandolin
Learn how to play the mandolin in this new class. Students will learn the basic mandolin chords and strumming patterns as well as learn how to play lead melodies by ear. By the end of the course, each student should have the skills to play basic Old Time, Celtic, and Bluegrass tunes and continue playing on their own with others in a jam setting. Students will need their own working mandolins, picks and tuners.

Cost: $79
August 11 – October 6
T, 6pm-8pm
Location: SCC, J103

October 13 – December 1
T, 6pm-8pm
Location: SCC, J103

Beginner Fiddle
In this class you will learn to play a selection of traditional tunes on the fiddle. Students will learn using tablature and recordings of these tunes, and you will be given instruction both as a group and individually. Hopefully, what you take home from this class will allow you to get into jams with other musicians in the future. No playing experience is necessary, but students must provide the following: a fiddle and bow in working condition and a tuner.

Cost: $79
October 6 – November 24
T, 6pm-8pm
Location: SCC, J114

NOTARY PUBLIC

Contact (336) 386-3580 or (336) 679-4600 to pre-register or for more information.

Notary Public
This two-night, seven-hour course prepares students to become a Notary Public in North Carolina. Topics include notary qualifications, guidelines, and processes for notarizing documents. After passing the course test, students are eligible to submit an application to the Secretary of State to become a notary.

*Note: In order to take this class, students MUST live/work in NC, be at least 18 years old, possess a high school diploma or High School Equivalency diploma, be able to read/write English, have no felony convictions (some misdemeanors apply), and have a valid driver’s license or NC State ID.

Cost: $71
Textbook $27.25 (subject to change)

PERSONAL ENRICHMENT

Note: Pre-registration and pre-payment required. You may register online or use the form in this brochure to mail, walk-in, or fax your registration and payment. Call (336) 386-3398 for more information.

Yoga
Tired muscles? Low energy? Yoga is a way to relax, stretch, and rejuvenate! Bring your yoga mat and spend an hour on yourself!

Line Dance
Do you feel left out at parties and weddings when everyone jumps up to do the Wobble? Learn all the latest line dances in this four-week session. Pat Adkins is the instructor.

Cost: $35
Improving Your Photographic Skills: Fall Foliage & Night Photography
During this class, the students will experience a “flexible class time” due to the topic and nature of this learning series. We will meet for our first class to discuss the field trips that will be for the next classes. We will be receiving input for determining the interest and traveling wishes of the class members.

Students will explore the different angles, lighting and compositions of landscapes and fall designs as well as capturing nighttime images of cities, buildings and homes in the areas along with the night skies.

Students should be equipped with a DSLR camera with interchangeable lenses (more than one lens is recommended but not required) and a sturdy tripod for the night time events. And as always, students should be very familiar with the settings on their cameras. If not, one might be interested in the “Getting to Know your DSLR Camera” that will be taught in September.

Cost: $59
October 12 – November 9
M, 6pm-8pm
Class will meet the first night to discuss field trips...the following class dates and times may vary.
Location: Pilot Center, 136

Fish, Reptiles, Small Game and Lifesize
The Summer/Fall taxidermy class covers both fish/reptiles and small game/life-size mounts.

Cost: $183
August 22 – December 12
Every other Saturday, 8:30am-3:30pm
Location: Pilot Center

TAXIDERMY
Pre-registration and pre-payment required. You may register online or use the form in this brochure to mail, walk-in, or fax your registration and payment.
Call 336-386-3618 for more information.

Digital Photography: DSLR / Mastering the Manual
This mini course will help you improve on your skills and become more proficient with your DSLR (Digital Single Lens Reflex) camera. From choosing the right equipment to understanding what it takes in getting the right shot, we will help increase your passion and proficiency in these two areas of capturing images. Please be aware this class is taught more from a DSLR camera perspective. We ask that you be familiar with your camera and that you bring your camera’s operation manual to class.

Cost: $49
September 14 – October 5
M, 6pm-8pm

**ADVANCED MANUFACTURING**

**Computer-Integrated Machining**
- Credentials Offered: AAS, D, C
- Employment as machining technicians in high-tech manufacturing industries, specialty machine shops, fabrication industries, and high-tech or emerging industries such as aerospace, aviation, medical, and renewable energy.
- Salary: $39,570

**Electronics Engineering Technology**
- Credentials Offered: AAS, C
- Employment as an electronics engineering technician, field service technician, maintenance technician, electronic tester, or production control technician to design, build, install, test, troubleshoot, repair, or modify electronic components and systems.
- Salary: $58,540

**Engineering Design Technology**
- Credentials Offered: C
- Produce drawings of mechanical parts, components of mechanical systems, and mechanisms. Employment in mechanical areas such as manufacturing, fabrication, research and development, and service industries.
- Salary: not available

**Mechatronics Engineering Technology**
- Credentials Offered: AAS, D, C
- Prepares the students to use basic engineering principles and technical skills in developing and testing automated, servomechanical, robotic, and other electromechanical systems used in advanced manufacturing. Graduates should be qualified for employment in industrial maintenance and manufacturing including assembly, testing, startup, troubleshooting, repair, process improvement, and control systems and should qualify to sit for Packaging Machinery Manufacturers Institute (PMMI) mechatronics or similar industry examinations.
- Salary: $47,910

**Welding**
- Credentials Offered: D, C
- Employment as an entry-level technician in welding and metalworking industries and in construction, manufacturing, fabrication, sales, and quality control.
- Salary: $36,720

---

**AGRICULTURAL SCIENCE**

**Horticulture Technology**
- Credentials Offered: C
- Work in a garden center or nursery, or as an entrepreneur caring for the growing and marketing of fruits, vegetables, flowers, and ornamental plants. Horticulture also incorporates the principles of art and design as in architectural landscaping.
- Salary: not available

**Viticulture and Enology**
- Credentials Offered: AAS, D, C
- Work in various areas in the grape growing and wine making industry such as vineyards, wineries, and related sales and services.
- Salary: $34,790

---

**ARTS & DESIGN**

**Advertising & Graphic Design**
- Credentials Offered: AAS, C
- Employment with graphic design studios, advertising agencies, printing companies, department stores, a variety of manufacturing industries, newspapers, and businesses with in-house graphics operations.
- Salary: $44,830

**Fine Arts**
- Credentials Offered: AFA Transfer Degree
- This degree allows students to take the first two years of general education credits toward a Bachelor of Fine Arts Degree. For this transfer program, careers could include any in the fine arts industry, depending on the focused area of study the student pursues at a four-year institution.
- Salary: not available

---

**BUSINESS & COMPUTER TECHNOLOGIES**
